Meet Guy Leggett – MCC's ACHR (Air Conditioning, Heating, and Refrigeration Technology) Instructor

Guy Leggett is a class of '99 graduate from MCC's ACHR (Air Conditioning, Heating, and Refrigeration Technology) program. Upon receiving his diploma, Leggett immediately found work with several local contractors. He soon had enough experience to be recruited for maintenance positions at MCC (Martin Community College) and then MCS (Martin County Schools). In 2004, Leggett decided to start his own business, Air Pro, Inc. in Williamston. He successfully owned and operated his business for eight years until he was hired by the Pitt County Schools System where he oversaw the cafeteria maintenance for 38 schools for nearly eight years. When MCC contacted Leggett about returning to his alma mater to teach, he was ready to take on the challenge.

Leggett states, "I have really enjoyed teaching my profession. I am especially proud of my students when they are offered great jobs within the ACHR industry before they even graduate. They are great ambassadors for MCC and our community!"

In addition to his Associates Degree from MCC, Leggett has also earned contractor licensure in both H2 and H3 levels of HVAC, electrician (limited), and commercial refrigeration.
